The publications listed here are the result of research done in whole or in part in the Connecticut College Arboretum. The bibliography includes all types of publications from class reports to peer-reviewed journal papers, books, and magazine articles.

Origin of the citations:
1931-1991 from Arboretum Bulletin No. 32 by Richard H. Goodwin
1991-2006 compiled from Arboretum Annual Reports by Glenn D. Dreyer.

The following abbreviations are used: Class Report, CR; Individual Study Report, IS; Undergraduate Honors Thesis, HT; Undergraduate Thesis, UT; Master of Arts Thesis, MA; Special Report, R. Published papers authored by Botany Department staff between 1928 and 1975 have been bound in a series of volumes that may be found in the Connecticut College Library under the title Connecticut College Matthies Botanical Laboratory Contributions. Unpublished documents cited through 1991 have been placed on file in the Connecticut College Library. Unfortunately, some of these are now missing. They are indicated by parentheses: (CR), (IS), (UT) and (R). Most publications from 1991 on are not collected in the college archive. A “+” after page numbers indicates additional pages of tables, figures, or appendices.

Asselin, N. 1999. Vegetation change in the Bolleswood Natural Area: the role of disturbance upon tree succession. CR.

Bazer, L. 1984. Social behavior and communication in Hairy and Downy Woodpeckers. IS.

Bilodeau, K. 1993. The Connecticut College Arboretum: environmental education for the community. IS.

Brauner, D. M. 1993. Territorial behavior and oviposition site competition in five species of dragonflies. HT.

Carson, L. 1999. The college storm water drainage system: the problem of urbanization. IS.

Chapman, Kelly. 1998. The Ethnobotanical Uses of the Compositae/Asteraceae family plants found in the Arboretum. CR.

1968. 32nd Breeding bird census. 65. Oak-hemlock forest and semi-open fields and shrubland. Audubon Field

Greene, Meridith. 2003. Migration and dispersal of the white-footed mouse, Peromyscus leucopus, across Mamacoke salt marsh and on Mamacoke Island in the Connecticut College Arboretum. HT.

Groce, J. 2001. Comparison of foraging behavior of different species of waterfowl at Mamacoke Island and Smith Cove, Thames River. IS.

Jones, G. S. 1977. Hemlock reproduction in the Bolleswood Natural Area. IS, pp. 44.

Joyce, W. C. 1999. Historical and current condition analysis of the Connecticut College North Dormitory Complex Landscape. IS.

2000. Landscape Design for the Renovated North Dormitory Complex, Connecticut College. IS.

Kluza, D. 1989. The breeding success of Red-eyed Vireos (Vireo olivaceous) in the Connecticut College Arboretum. IS, pp. 1–.

1955b. Research projects on herbicides: practical applications of interest to property owners, sportsmen, foresters, and public utilities. Connecticut Arboretum Bull. 8:14-17.

Rowe, H. 1974. Lichens as indicators of air pollution levels. (IS), pp. 61.

Shearin, A.E. 1964. Soil survey along the permanent transects in the southern section of the Bolleswood Natural Area. (R). Information incorporated into the transect database.

Stark, W. 1982. The analysis of seeds recovered through flotation at the Mamcoke Cove prehistoric site. IS, pp 56.

Thompson, C. 1998. Medicinal uses of Arboretum plants in the Pinaceae, Fagaceae and Aceraceae families. CR.
